BEORN BISHOP

Vienna, Austria | Permanent Recidence Permit | mailto@beornb.com | +43 676 489 7987
| www.linkedin.com/BeornBishop

VP of Engineering combining strong traditional development principles with AI augmentation to deliver scalable, solid solutions. I have evolved from leading traditional teams to building lean, AI-augmented teams capable of delivering secure systems on time and at scale. Leading execution, architecture, and engineering culture with full responsibility, tightly aligned to business strategy.

CORE COMPETENCIES

Leadership | Team Building, Mentorship, Talent Development, Engineering Culture, Agile Delivery
Technical | System Architecture, Cloud Infrastructure (AWS/GCP), DevOps, Blockchain Infrastructure, SaaS Development
Strategy | Technical Roadmap, Product Strategy, Platform Development, Scalability Planning
Operations | Agile/Scrum, Project Delivery, Vendor Management, Workflow Automation
Technologies | Node.js, React, Next.Js, React Native, PostgreSQL, Redis, Solidity

PROFESSIONAL EXPERIENCE

VP of Engineering, Morpher — **Apr 2024 - Present | Vienna, Austria**

Morpher - Trading Platform

- Reengineered the architecture of Morphers entire mobile application using Expo, reducing crashes and bug reports by 80%.
- Rolled out a company-wide AI-augmented workflow for AI-integrated features, significantly increasing development output, doubling feature releases in half the time and reducing post-release bugs.
- Set up a standardized AI tooling stack and usage policy, reducing AI-related coding issues and information leaks.
- Optimized AWS infrastructure for Morpher, reducing our monthly AWS bill by 50%.

Frenzy.Finance – Trading App (Product Launch 2026)

- Rolled out a full-stack application for Frenzy.Finance with onboarding, on-chain deposits and withdrawals, Fiat deposits and withdrawals, and on-chain trading transactions, delivering a production-ready product from concept to launch within 6 weeks.
- Delivered the Frenzy.Finance application start to finish, achieving a user base of 500+ active users within 6 weeks of launch.

UPD – Privacy-Focused Stablecoin (Proof of Concept)

- Created a landing page website for UPD.io to communicate project information and use cases, supporting stakeholder and investor understanding.
- Built a basic UPD application for currency swaps, private transactions, and token transfers in and out, serving as a proof of concept for fundraising activities.

Principal Software Engineer, Morpher — **Jan 2020 - Mar 2024 | Vienna, Austria**

- Led a project to migrate from a self-hosted sidechain to the public Base chain, reducing infrastructure costs and increasing user and ecosystem exposure.
- Built and led a high-performing engineering team, increasing delivery velocity by 40% and strengthening ownership culture.
- Implemented DevOps and CI/CD pipelines, cutting deployment time from 2 hours to 15 minutes and accelerating feature delivery.
- Aligned engineering with growth strategy, supporting market expansion and contributing to 2x user growth

Technical Director, BizFrame — **Jan 2002 - Jan 2020 | Johannesburg, South Africa**

Progressed through multiple roles over nearly two decades, culminating as Technical Director at Bizrame, guiding teams and delivering reliable software solutions across industries.

- Pioneered the BizFrame Platform, creating a rapid-application framework adopted by 10+ enterprises and portals, accelerating web application development.
- Delivered large-scale enterprise systems, including customized ERP and asset management platforms supporting 10,000+ assets and integrating 100% of core business functions.
- Improved business agility by building workflow automation and customer-facing solutions, streamlining operations and boosting client efficiency.
- Built and mentored development teams in Agile practices, significantly increasing delivery quality and fostering a culture of maintainable, user-friendly software.
- Led technical innovation at scale, balancing design with business needs to deliver durable solutions used daily by 10,000+ users across client operations.

EDUCATION & QUALIFICATIONS

2016 – 2018	UNISA South Africa |BSC Informatic
2015	MCSD: Web Applications, Microsoft Certified Solution Developer. CSM Certified ScrumMaster
2014	IT Masters, Cross platform mobile app development
2001	MCSD, Microsoft Certified Solution Developer vb6

LANGUAGES

ENGLISH C2 / Native AFRIKAANS B2 / Working Proficiency GERMAN B2 / Intermediate

TECHNOLOGIES

FE frameworks & libraries | React, Next.js, Vue, Angular, React Native, Tailwind, Shadcn, jQuery, Framer Motion, GSAP, Astro
Backend & server frameworks | NestJS, Express.js, Ruby on Rails, ASP.NET
Languages | javascript, TypeScript, C#, VB.NET
Databases & ORMs | Postgresql, Microsoft SQL Server, Prisma, Sequelize,
Caching & messaging | Redis, Kafka / RabbitMQ
Infrastructure & deployment | Docker & Kubernetes
RPC / API stacks | tRPC, GraphQL
Monitoring Tools | PostHog, Sentry, Datadog
